Just transferred files from my old to computer to my new one last week. Had to go Renegade cold turkey due to lack of Internet connection to my computer (No DirectX10) and so I decided to put my amateur dos skills to work and make a simple dos batch file game. I called it blunt soap for no apparent reason.

To play it extract it to your C drive directory, not under any other folder or it wont work due to the lack of support to go up directories relative to where you are using a batch file. Someone prove me wrong with that please.

To play the incomplete game simply run the shortcut and type in bsoap then press enter.

What do you think of it?

PLEASE USE THE ATTACHED BLUNTSOAP.RAR ON MY POST FURTHER DOWN THE PAGE.
