pointless if u make 2 versions, but i prefert not fixed

This is the problem with all of you people arguing of not wanting something to change. The TT team can just make the change and say 'fuck you' to leaving it the same (to the fixed version). No, they are not doing that though. They are nice enough to make 2 'versions' to make all your complainers happy and this is the treatment you give them? Grow up. At least they are making both sides happy and you are just being difficult.
