can you honestly tell me you're going to play a lot more renegade after this patch is released? if no then maybe you shouldn't talk and you should let the people it will actually affect worry about it

I plan on playing significantly more than I do now once it's released. I agree with Chuck Norris, 100%. It was unintended, so it's broken. Fix what is broken.

This is fine.

I'd require it for the ladder, though.
