Do you guys have a procedure for upgrading? I'm not really fond of entering in the brenbot.cfg each time.

I assume I could just copy Brenbot.exe, Brenbot.dat over my old version and all should be well.. or not?

Thanks!

You only need to extract the BRenBot.exe if your upgrading to a new version.

And you must extract the 'renguard.cfg' file and reconfigure that i believe.
