Of course.. as long as you remember your username+pass. You can access your account on any computer if I'm not mistaken.

No.

If the cd key isnt correct on the system the user is logging into, no matter what the password, the login wont work. Passwords in Renegades are not like steam ids. You can create a million logins with one cd key, yet without the cd key, they are worthless.

I own 2 copies of Renegade, both ofcourse which have seperate CD-KEYs.

I am able to log onto WOL with the same username & pass on either serial.

And this isn't on the same PC either, My PC & Laptop use seperate serials each and I log onto my WOL account WNxCABAL without trouble!

Incorrect, I have had around 5 Renegades and installed them on different computer,s, my login works with all.

I know for a fact that you have an account for WOL, not for your serial for Renegade.

So in order to create a valid WOL id you need a valid cd key. Then once you have created a valid WOL you then need to play it one a computer with a valid cd key. So if you have 2 WOL ids created by the same cd key, only one will work at a time no matter the cd key as long as the cd keys are legal?

only one serial number can be used to get online at one time-

So, I can go over to my friends house and use my account, but I can't bring ren over, install it with my cd's and case, come home, and have both of us play at the same time.
