About 7 months old, but still interesting:
<http://news.com.com/2100-1028-5172948.html>

Quote:you would have to vet your designs with law enforcement before providing your service.
There will be a queue. There will be politics involved. It would completely change the way services are introduced on the Internet.
They expect congress to blindly make this law and put programmers between a rock and a hard place.
