I think that means, if it's server side you can see it. If it's not you can't.

No it's not. If the host puts it in, the clients can see it. If you have the map in your data folder, you can't see it.

renalpha wrote on Wed, 08 August 2007 17:34thats correct, if you edit a map serverside use objects.

else use tiles wich are made for create a new map from scratch

You can use tiles serverside.

wenn ich den mod in mein Data Ordner mache und ich hoste ein Server dann geht es einwandfrei, nur wenn ich die sagen wir mal C&C_Complex.Idd auf ein renegade Server mache da sieht man dann die Gegenstände die eigentlich unsichtbar sein sollen.

if I do mod in my Data folder and then I hoste a server goes it perfectly, only if I them we say sometimes C&C_Complex.Idd on a renegade server does there then one sees the countersaint of Ø' nde them, actually should be invisible.

This is Multiplay lan test server:

And this is Multiplay Internet:

Ich möchte das als server side mod haben das die unsichtbar sind und nicht sichtbar.
So wie beim ersten screen, was aber nicht vom renegade server sit sondern von Multiplay lan.
