Look, like 2 years ago I CHEATED. I AM NOT DENYING IT. my account was pillogun and i CHEATED beyond belief, big head mod, 1 hit kill mod, auto aim, super speed, super run, i had it all. Then i got banned from renguard, forever. Its been 2 years from that time. I am BEGGING for mercy here! i deleted anything even related to cheats and hacks. I just want another chance. PLEASE

My new account is pillowgun1 by the way

also, i attached a picture of what it looks like when i try to join...anything=(

just dont use renguard? only server that i know forces renguard is n00bstories, and that server is stupid. Other servers require renguard for commands, but why do you need them? You can play just fine without renguard. If you're banned from WOL, download resurrection from www.icefinch.net
