
Subject: [script]AirStrike function

Posted by [reborn](#) on Wed, 05 Dec 2007 12:34:31 GMT

[View Forum Message](#) <> [Reply to Message](#)

I made an airstrike funtion. Again I called it via a chat hook but it can be called in a number of ways.

The function chooses a working enemy building at random (this part is thanks to WhiteDragon, you have no idea how long and how many attempts it took to actually get that part right). Then either Nod lear jets or a10 bombers start flying over. One of them drops off a small payload to the random building an causes it to lose 50% of it's health.

The sounds and the rest of the planes flying over make it really realistic to be honest, I think it's quite smooth.

I set the a10 and lear jet to un-teamed via the objects.gm file because they count towards the vehichle limit otherwise. There are other ways of getting around that, but this seemed easiest. I think I remember a slight issue with it with regards to the cinematics looping after being called. I'm sure that's just changing a 1 to a 0 in the text file somewhere after the animation.

Here's a video of it, it's 21mb long, but you should get a half decent download speed. It's worth watching even if you arean't going to put it on your server, just to see it in-game. It's a bit long, and I sound half asleep (because I was), but it's fun to see if you havn't before:

http://www.mp-gaming.com/reborn/movies/air_strike2.wmv

Here's how I made it work:

```
////////////////////
////////////////////
//// GDI A10 strike ////
////////////////////
////////////////////
```

```
void reb_GDI_a10_strike::Created(GameObject *obj) {
Commands->Create_2D_WAV_Sound("m00evan_dsgn0073i1evan_snd.wav");
Console_Input("msg Warning!!!");
Console_Input("msg A-10 strike inbound at Nod's position");

GameObject *BuildingObj = Get_Random_Building(0);
BuildingID = Commands->Get_ID(BuildingObj);
A10ID =
Commands->Get_ID(Commands->Create_Object("Invisible_Object",Commands->Get_Position(B
uildingObj)));

Commands->Start_Timer(obj,this,3.0f,1);
Commands->Start_Timer(obj,this,6.0f,2);
```

```

Commands->Start_Timer(obj,this,9.0f,3);
Commands->Start_Timer(obj,this,10.0f,4);
Commands->Start_Timer(obj,this,17.5f,5);
Commands->Start_Timer(obj,this,25.5f,6);
}

void reb_GDI_a10_strike::Timer_Expired(GameObject *obj, int number) {
GameObject *thebuilding = Commands->Find_Object(BuildingID);
GameObject *a101 = Commands->Find_Object(A10ID);

Vector3 position = Commands->Get_Position(thebuilding);

if (number == 1){
Commands->Create_2D_WAV_Sound("m00evan_dsgn0014i1evan_snd.wav");
}
if (number == 2){
Commands->Create_2D_WAV_Sound("m00evan_dsgn0066i1evan_snd.wav");
}
if (number == 3){
Commands->Attach_Script(a101,"Test_Cinematic","a-10_1.txt");
Commands->Attach_Script(a101,"Test_Cinematic","a-10_2.txt");

}

```

```
};
```

This goes in the engine_gm.cpp file, and is worth making a topic about all by itself. WhiteDragon made the final solution after some really good coders looked at the problem. The function returns a working building for the team specified at random:

```
GameObject * Get_Random_Building(int Team) {
    std::vector<GameObject*> Buildings;
    GenericSLNode *x = BuildingGameObjList->HeadNode;
    while (x != 0) {
        GameObject *obj = (GameObject *)x->NodeData;
        if (obj && (Get_Object_Type(obj) == Team || Team == 2) && !Is_Building_Dead(obj)) {
            Buildings.push_back(obj);
        }
        x = x->NodeNext;
    }
    if (!Buildings.empty()) {
        int Rand = Commands->Get_Random_Int(0,Buildings.size());
        return Buildings[Rand];
    }
    return 0;
}
```

```
GameObject * Get_Random_Building(int Team);
```

Here are the conematic files that are called:

I made it specifically for SSGM, so your server would need to be running that.
You need to download the source code to SSGM that comes with the binaries anyway. You can find this on the [www.black-cell.net](http://www.black-cell.net/downloads/index.php?act=category&id=6) downloads page here
<http://black-cell.net/downloads/index.php?act=category&id=6>
(you will want the win32 version).

Then you open up the .sln file located in the source code folder with microsoft visual studio. If you do not have visual studio installed and set up, then you can see this post here created by JohnWill for exactly that purpose:

http://www.renegadeforums.com/index.php?t=msg&goto=296486&rid=3415&srch=express#msg_296486

You add most of the code to the gm_main.cpp file, but there is some that goes in the gm_main.h file and the engine_gm.cpp and the engine_gm.h file.
Obviously you need to compile it aswell.

The cinematics need to be copy/pasted into there own .txt files and named what I have put just above the code tags and placed in your servers data folder.

You could call the function with a chat hook for testing, but ideally you will call the function some other way to add to gameplay.

chat hook example:

```

class GDla10ChatCommand : public ChatCommandClass {
void Triggered(int ID,const TokenClass &Text,int ChatType) {
    GameObject *obj = Get_GameObj(ID);
    Commands->Attach_Script(obj,"reb_GDI_a10_strike","");
}
};
ChatCommandRegistrant<GDla10ChatCommand>
GDla10ChatCommandReg("!a10g",CHATTYPE_TEAM,0,GAMEMODE_AOW);

class NodjetChatCommand : public ChatCommandClass {
void Triggered(int ID,const TokenClass &Text,int ChatType) {
    GameObject *obj = Get_GameObj(ID);
    Commands->Attach_Script(obj,"reb_Nod_Jet_strike","");
}
};
ChatCommandRegistrant<NodjetChatCommand>
NodjetChatCommandReg("!a10n",CHATTYPE_TEAM,0,GAMEMODE_AOW);

```

I Run SSGM And Lua Plugin V2.0

so do i follow the tutorial you sent in last post

Subject: Re: AirStrike function
Posted by [reborn](#) on Wed, 05 Dec 2007 13:39:01 GMT
[View Forum Message](#) <> [Reply to Message](#)

This code is c++ not LUA, but the LUA plug-in will not harm it in any-way.

If you get visual studio and the code to the right places. compile it and put it on your server then yes, you will be able to use the script.

Hm, reborn are you done with renegade, or why are you realising all your code?

Subject: Re: AirStrike function
Posted by [reborn](#) on Wed, 05 Dec 2007 15:07:13 GMT
[View Forum Message](#) <> [Reply to Message](#)

I'm not done with renegade. I am hoping to set a trend.

If someone uses this code and the people in there server are happy with it then that's cool.
If someone reads this and thinks of a way to adapt it to suit there needs then that's cool too.
If it encourages others to post stuff then I might learn something, or it might give me inspiration, that's awesome.

There are allot of reasons to release the code, I could go on for a long time talking about the pro's. I can't really see any cons. Sure I might have had a unique feature for my server. But I don't really think it matters how cool your server is, people only seem to join the a0 servers anyway. Besides, then people would only get to experiance it in one server.

Plus, I am not the greatest programmer there is. Infact I am probably one of the most newbie programmers here. I really won't dispute that, there are allot better coders then me here. Allot better. So if I post this then there might be someone who see's it and makes it better. Whether they do it out of kindness, ego, boredom or whatever it doesn't really bother me. But they might make it more efficient, or have a better idea and make something more awesome.

I have seen this kind of sharing, helping and collaberation on other game forums. Granted, they had more people that actually knew how to code, but it was really impressive to see people helping eachother out. There's few people here that do that. I don't know why. If I can encourage others to do the same then I will be really really pleased with myself.

What you should do is when you call a function which is supposed to return a pointer to something, check the pointer to make sure it isn't NULL.

```
GameObject *a101 = Commands->Find_Object(A10ID);
if(!a101)
{
    //an error
}
```

It might working in multiplayer practice if you mod your client scripts.dll to include this. I haven't tried doing that. But I guess it could be possible to have all the features of SSGM in your single player mission and mulptiplay practice.

I have no idea if it would work in the demop, I don;t know how much things differ. Tjere might be addresses and stuff that have changed that the rest of SSGM relies on. Show the code to the people who are making that demo server regulator thing, they might have a better clue.

He wanted a chat hook that made it cost a player 5000 credits to call in the airstrike. I made it for him.

Here is a compiled version with source code:

<http://www.mp-gaming.com/reborns/coderelease/white.zip>

It really is only a cheap chat hook. I don't really recomend it tbh, my idea was to have the function called as some random event, or a power-up. Not based on credits.

The chat hook can be used in team chat with !a10n and !a10g, both teams can use either one. He didn't ask for Nod to only use the Nod one and vise-versa, but really all you have to do to enable that is add to the conditional where I check for the credits the players has for there obj's team.

Why would you want a chat hook for that? It hits a building for 50% of its health, that basically means anyone with a lot of credits can decimate a building. And chat hooks are quite unoriginal.

I made a chat hook for testing purposes, but then wittebolx asked me to make him a chat hook that he could use for gameplay purposes.

I did actually say I didn't recomend it, frankly I agree. I hate all the nasty chat hooks. I intended for the functions to be "seemless", like a random event or a crate. Like it was supposed to be in the game or something, not some tacky chat hook.

They just stay there, but no loop?

That makes sense I guess, it's just stuck on the last frame of the animation...

They are all real objects, so you can destroy them. I can't remember from memory what the right syntax is, but it is most likely something simple like `destroy_object`;

Or you could attach a script to it that destroys the object after x amount of time...

```
void reb_timed_destroy::Created(GameObject *obj){
Commands->Start_Timer(obj,this,31.0f,1);
}

void reb_timed_destroy::Timer_Expired(GameObject *obj, int number){
if(number ==1){
Commands->Destroy_Object(obj);
}
}
```

```
ScriptRegistrant<reb_timed_destroy> reb_timed_destroy_Registrant("reb_timed_destroy","");
```

```
class reb_timed_destroy : public ScriptImpClass {
void Created(GameObject *obj);
void Timer_Expired(GameObject *obj,int number);
};
```

Just change the float value 31.0f to however many seconds you want it to wait until it destroys the object it is attached to.

SSnipe wrote on Mon, 12 May 2008 20:52why cant i get it i think i put the codes in the right places

1>.\gmscripts.cpp(68) : error C3861: 'Get_Random_Building': identifier not found

...wat files to put the code inThe Random_Building is an addition to SSGM and has to be put in this way:

engine_gm.cpp

```
GameObject * Get_Random_Building(int Team) {
    std::vector<GameObject*> Buildings;
    GenericSLNode *x = BuildingGameObjList->HeadNode;
    while (x != 0) {
        GameObject *obj = (GameObject *)x->NodeData;
        if (obj && (Get_Object_Type(obj) == Team || Team == 2) && !Is_Building_Dead(obj)) {
            Buildings.push_back(obj);
        }
        x = x->NodeNext;
    }
    if (!Buildings.empty()) {
        int Rand = Commands->Get_Random_Int(0,Buildings.size());
        return Buildings[Rand];
    }
    return 0;
}
```

This comes right after "GameObject *Find_My_Veh"

To get it working, you have to put the following into

engine_gm.h

```
GameObject *Get_Random_Building(int Team); // Selects a random building which has to be alive
```

```
This goes under "GameObject *Find_My_Veh(GameObject *obj); //Find my vehicle"
```

Generally, scripts should go into the gmmain.cpp, their classes into gmmain.h, ScriptRegistrants into gmmain.cpp OR gmcrate.cpp (does work even if it isn't a crate event). Chat hooks are in the gmmain.cpp, their Scriptregistrants can be put either in gmmain.cpp OR gmcrate.cpp.

=====

Reborn thanks for the script, I'll check it later.
