Here is my first model that I would like to put into renegade, or more accurately, Reborn. If you want to unwrap it, download it, and if you want to skin it, I'll send you some sample pictures of what the model looks like.

btw: its a 1972 trans am.

EDIT: The scale seems to be screwed up, if someone could show me how to change the entire model to inches, instead of meters, that would be greatly appreciated.
