because it uses scripts 3.4.4 also when i want to use 3.4.4 in renegade it crashes when i want to
load a map

maybe its my old video card. im getting a new one tuesday, hopefully it will work then

It's next release will use 4.0, so whatever problems there where may have been fixed.

I have the same problem as Di3HardNL except that when I try to run renegade, It crashes right before the intro starts. But when i get rid of the scripts 3.44 it works fine. And i have a really good computer. Custom built just this year.
