Had a problem building this into the mix, so its the map model and skin files. It still changes textures in C&C\_walls map only. It's 10 files, not like it's loads

preview

Download attached.  
Extract all files in the rar to your data folder to install

Yeah that's right , just changed the ground textures though so it fits in more, and made it so they only affect this map only.

Texture for the walkways is too repetitive, and from afar looks like pie, but other than that, it looks okay. Good job.
