I have a screenshot of what happens, you can see it by clicking below.

<http://www.n00bstories.com/image.view.php?id=1581549231>  
<http://www.n00bstories.com/image.view.php?id=1108585795>

If anyone can tell me how to get around these, please tell me.

BTW: Im using the .NET framework v1.1

I am just gonna try this --> <http://www.microsoft.com/ddk/debugging/> ...

Maybe that will help.

Ok i had the same problem

1. Move all the DLL files into C:\WINDOWS\System32

This should work, however it didnt for me soo...

Download .NET Framework 2 (not 1.. or i got version 2 and BR .NET works for me now..)

EDIT::

I didnt have the 'JIT' error, just the 1st one :rolleyes:

I did the move thing and that don't work but what you mean version 2 I just got the newest one which was in beta and was certainly not version 2 :/ .

If he asked for tech support related to RedHat 8 and i pointed him to redhat.com would that be spamming? no. I simply directed him to the OFFICIAL FORUM FOR THE PROGRAM HE IS USING.

OK will go there and try not to upset ACK...

I found somebody with the same problem  
[http://forums.renevo.com/ultimatebb.cgi?ubb=get\\_topic&f=19&t=000012](http://forums.renevo.com/ultimatebb.cgi?ubb=get_topic&f=19&t=000012) ...

It would be a good idea to lock the topic now I think.

Out of your 18 posts, all you've done is post about RenEvo and spam our forums.

Cut it out, kid.

no. i havent. read all the forums. KID. What good would it do for me to NOT tell the people where to get help. There is no one on these forums that worked on BR .NET coding. No one that knows it like dante. Therefore telling him where to contact Dante != spamming. Sorry to burst your bubble, KID.
