Hi all!

We were trying to setup a TT4.0 server, and it worked perfectly except TSR.

We had it configured correctly (at least we think it was), but it just cannot switch teams.

```
TeamSpeakServerIP=127.0.0.1
TeamSpeakTCPport=10011
SApassword=pas
TeamSpeakServerID=1
TeamSpeakAddress=127.0.0.1
LobbyChannel=1
Channel1=5
Channel2=7
EnableExplanationMessages=true
```

nothing wrong here.

but in server side blue-screen console, no matter who joins server and join our ts server in the same time, it says that  
player did not join our ts server.  
but the player actually did join both with same ID.

and, in TS Client, it just put player in channel Guest( 8 ),  
no matter how many rooms we have.

we really run out of solution.  
please help  
thx and have a nice day:)
