I released 3 Renegade server addons several years ago if you remember what they are and they're useless since the release of scripts 4! Good job TT

Here is the source code and feel free to use if you found them useful.

Serial.dll
ReservedSlot.dll
TextFilter.dll

No readme, no documentation, no support, it may still be able to compile though.

More to come, enjoy!

Xpert wrote on Tue, 19 February 2008 04:58The day Adad releases any bit of source code to anything will be the day mankind is extinct. ;p
The day is getting closer and closer
