I crashed when I tried to quit out of my server. Pretty much a vanilla server. Only had 2 plugins running that are my own, but I don't think they could cause the problem, since they don't really do anything at all.

I can't look at the crashdump right now as the build server is down at the moment unfortunately. I'll try to see if I can figure out whats going on. Does this happen everytime or just this once?

Due to the loss of our symbol server, it is no longer possible to debug this crashdump (or any other crashdumps occurring in any current scripts 4.x builds)
