ban and kick this player always, I just got done playing on Devs HOuse. every round he always helped the enemy team, either by telling them the game plan or by repairing enemy tanks and buildings. it sounds funny at first but to continue to intentionally screw your teammates is bogus. (I actually was on other team and gave up my Stank when he started repairing it because I thought it was unfair.)anyway ban and kick this N00b.and oh yeah, KANE LIVES!
