heh, yea, those ruches RCK, i mean, the idea of stealth isnt to be stealth, is it? anyways, teh ST's min advantage is that it can hide in teh fields, waiting for teh meiums/mammys to roll by, then rush teh AGT while no one is around to defend, 9/10 tims it works, only well balaned teams (clan matches usually) have a chance of stopping it, especailly if there are 3 or more
