You know when placing a nuke always have the disarming engineers in dilema.find as closed up an area as possible...plant a timed C4 then plant the nuke....engineers come ignore the C4 go for the nuke... result:1/2 disarmed nuke... 2 engineers and 1 building in pieces....(helps to stick around and distract engineers with gun fire)engineer goes for C4... (kill the guy going for the nuke)... stand infront of the nuke and make like a palestinian suicided bomber.result: 1 building in pieces... and you in it...
