quote: The PSG-1 is more of a SWAT-type rifle - it doesn't respond to battlefield conditions well. Think of the Barrett Model 82A as (H3ll, might as well go with WWF 4nalogies) The Big Show, while the PSG-1 is more of a Rock. Agreed. Note though that I was referring to PSG-90, not PSG-1. PSG-1 has a weaker caliber - I seem to remember that it's 5.56 Nato rounds, while the PSG-90 has .50 cal rounds.
