i know a really easy way to balance the sniper rifle, taht makes it useless against vehicles or choppers but perfect against infantry, make it only have 1 shot per clip, so 1 shot, reload and so on and then none wuld shooting tanks and such because they have to reload all the time and wuld take 5 reloads to kill a chopper instead of 1. but infantry are 1 shot = 1 kill so therfore it wuldn't matter against infantry.
