I know, I get to the first "little ramp" and I placed an ion cannon beacon. It took the plant to 1 bar of health before it died. Which I promptly finished off with a personal ion cannon shots after I died and bought the 1000 sidney. I also found out that she's not so bad when it comes to taking out building. Not as good as C4 or beacons. But she's alright. Good for the nod turrets anyway.
