So far I have only seen one tank stealer in the retail version of the game...the demo though, wow...every game is loaded with them! The last game I was in though I was nod. GDI comes in with an APC full of engines and they get out. I steal it, kill them and get out to repair. Guy jumps in, I'm like I stole that fair and square He gets out, says sorry and I get back in, happily drive to the other base and blow up the barracks
