quote:Originally posted by PuNk:i hate u *****s who put miens all over.. so noobish.. put mines on the way down.. so the tanks die before they can get to the tower? ever think of that?Teh closer you are the the object you are defending the less mines you'll need. So don't put them too far away.Oh, and I see no reason to call anyone newbs for thisI'd suggest put at least 10 to 15 mines infront/inside of the AGT, and the rest at the tunnel. Always have at least 1 (if it's 8 vs 8 to 16 vs 16, I'd suggest more) person help defend the AGT from attacks. Same with the Obelisk.
