Hey, I need some people for volunteers (server runners) for a server.dat patch that will BLOCK anyone from joining a server with:
Names longer than 26 chars
Block anyone from joining the server witch special characters, with the exception of:
! @ # $ % ^ & * ( ) - _ + = { } [ ] | \ ? / > < these will be allowed, SPACES WILL NOT BE ALLOWED.

Basically this is to stop cheating bitches that join the server with a whackass name or from using that super long name to crash the server.

Patch will probably be for windows, because I don't feel like fooling with linux....
