Subject: No preset list?
Posted by WNxCABAL on Tue, 13 Jul 2004 00:00:32 GMT

Yeah, I don't have this bug, but my Task Bar abbsolutly f00ks up from time to time.
I find the best way to fix the Task bar bug is to load up the Task Manager (on XP), it returns it back.
Not sure if this will fix the preset bug though, i never have this trouble.

Andy.
