I know theres a renguard IRC chat room.

But hows this for an idea.

When you load up Renguard and when it loads up the client MOTD page, theres a link on the left to log onto a community chat room where renguard users can meet up, invite to servers, meet up for Clanwars, etc.

This could prove to be a nice feature for the RG Client as 1) Chat rooms can be moderated (unlike WOLchat) 2) you know for sure the person on the other end is using Renguard and not cheating. and 3) can attract more people to using RG as opposed to just using it for its anti-cheat capabilities.

Don't flame me if you have another opinion, but it was something that just came into my head when launching it for a couple of times in the past.

Andy.
