On Win2k Pro, it starts up fine, but after about 15-20 mins i get this error.

LogFile:
[8/17/2004 12:27:10 PM] RenGuard SSC Version 0.9.3 by djlaptop Ready.
[8/17/2004 12:27:10 PM] Checking for updates.
[8/17/2004 12:27:10 PM] No updates available.
[8/17/2004 12:29:25 PM] Shutting Down.

[8/17/2004 1:05:14 PM] Connected To Master Server.
[8/17/2004 1:05:15 PM] Session ID Received.

Also a suggestion. I noticed that you have a public message/page for players who are not running RenGuard. But, for the server owners that want to use the option NOT to require RenGuard to join, could it be possible to have an option to give a public message/page for the players who are running RenGuard. And is it possible to write the player names to a text file?
