NodbuggerEngland must still be in the dark ages, my house has been cable ready for at least a decade. I have had it for at least 6 years now. And it has been around 2-3mb line. I don't exactly live in a city either. When I first moved here we had farms in every direction.

Think of it this way. You can get nearly everywhere fast by train in England, but you can get online nearly everywhere in the US
