SuperTechA minimum of 7 people need to all work together to make this complex tactic happen? Get real! You're assuming that no snipers will be on the bridge. If they are on the bridge, your transport and apache will be toasted.

A easier and more effective tactic would be a massive stank rush or an APC carries a sniper, SBH and tech to PP and they cover the nuke with sniper and APC while tech goes for MCT.

It would make more sense for the sniper and the sbh to nuke the pp then the apc drives to the ref with the tech and the tech (hopefully) will blow up the ref. While the Sbh is nuking. 2 buildings with one rush not easily done but very effective.
