Im on box and the guy renting it says it has no firewall. I do not see any program running that could cause this problem. Could it be with the people who host the box. They do not allow IRC. Could that have anything to do with it? HELP ME please GSA is a little booring without WOLSPY and the Westwood players. The server works with no hitches on GSA with BR running.

upsteam bandwidth 4m bps detected
gets lists...
got server pings...
Logging in to USA server
Fialed to log in, retrying

OVER and OVER but works witout a hithc on GameSpy
