Hmm I can't seem to get it working. I got the setup, it did it's thing. A window popped up asking for my Renegade Dir, so I sent it to C:/Westwood/Renegade/

It popped up something else that ran through all the files, said Install Complete and added a Ren Revolver link to my desktop. The link doesn't work, and I can't find anything in my renegade folder or anywhere that shows it even put anything in.
