Can you not simply make a list, like I did, WHY germany is based on marx theories?

Because, come on well-fare is not a good argument.

Marx don't thought about well-fare when he stated 'equal live circumstances', he meant, that EVERYTHING is owned by the woorking-class, noone 'owns' something, just the community. Come and visit Germany and you'll see we all wear different closes, eat different things and (nearly) all companys are private.
