Subject: NAV Help
Posted by c0nFuZ0r on Sat, 04 Dec 2004 23:47:20 GMT

I decided to run a a few scans on my PC today because of this..
LOL

I ran a scan earlier today, and it found several things..

I clicked delete, but it left one

I was wondering how to delete that last one.. I heard something about going into regedit to fix it..?

Another thing with NAV, when I right click on the icon on the bottom right of my screen and disable it, this keeps popping up..

Does anybody know how to get it from popping up when disabled..
