IceSword7Have you ever seen the tremors2?

I think the gun nut guy is named burt. Anyway remember that gun he used to take out that one walking graboid. It was like super powered and not only did it blow the graboid to pieces but it cut right threw the truck behind it.

THATS WHAT GUN SAKURA AND HAVOC ARE USING!

You're being unusually coherent here, but I'm betting that gun "the Elephant Gun", they called it, didn't have infinite range, and wouldn't do more damage than a rocket launcher.
