Aircraftkiller1. It's Nod, not NOD.

2. When I designed Glacier Flying, I added the Guard Towers there by placing the files necessary for them to work correctly with the editor inside of the *.mix file.

3. Go to Objects > Vehicles > Mounted > GDI_Guard_Tower and place that. Make sure to stick it inside of the ground just a little bit.

Actually Nod acts like N.O.D. sometimes   (N00bs On Defence)
