Yes u can change it via reg file:

Windows Registry Editor Version 5.00

```
[HKEY_CLASSES_ROOT\Wchat\Nick1\Nick]
```

```
@="UESCat998"
```

But u will have to restart renguard and renegade if your Renegade is running.

I never change my nick name in WOL, but some n00bs does not know that

they have to restart renguard when they change their nick, and that's one reason for some people, not to run renguard
