macYour no cd patch must be applied BEFORE installing RenGuard, like the Readme states.

To fix your problem, download game2.exe from http://download.renguard.com/rg_downloads/English_GameEXE.zip and place it as game2.exe in your renegade directory, where game.exe is RenGuard (which is about 350kb in size)

I tried it as well. There was no readme file in the zip file. Am not abled to get renguard to work. At one point even gotten a error 17 after redownloading renguard and core patches.

Going back to using the CD.
