NaamloosThe terrain doesn't look a lot different from renegade.... maybe my pc can handle it... maybe...

That's because 80% of these screenshots have detail on low. (Shame on you guys for using ultra high resolutions on low detail).

Here's a movie of a server I joined that was just one room, lol. It was chaos, and this recording didn't show the ultra grenade fireworks.

Yes, the movie IS an exe. Just open it after it downloads and it will play. It's Bink video.
