Subject: Obelisk, walking backwards...
Posted by Nate on Thu, 10 Apr 2003 00:00:19 GMT

So you mean this doesn't work now? In some games like City_Flying... I saw some GDI hotwire was able to run to the OBELISK. Fotunately, I saw it and blow his butt with a land mine.

I just want to know if the obli still works and where they enter any map. Just interested... in hope they can be stopped. They can be stopped but... I just want to make sure so I can look out for certain places.
