Majiin VegetaAMD Athlon XP 2500+ (Barton), 1.83 GHz
1024MB DDR RAM
x800 Pro 256MB
80GB HDD

plan to upgrade my CPU sometime but the stores online i checked only have AMD CPU's that will give me a 200MHz boost :/

MHZ isn't generally the only thing that shows how good a CPU is. The Athlon 64's are around 2.4ghz but they blow away a lot of CPUs out there.
