ScampMadtoneIf you want secure, reliable and professional design/hosting.

http://www.freeflow-solutions.com is the answer

PM for any pricing or examples needed. I have satisfied clients who can provide testimonials on request.

I can provide a not so satisfied testimonial. We had you code a tutorial script for Digital Depiction and we get it with an ugly "FREEFLOW SOLUTIONS" banner splashed across the bottom that you don't want us to remove.

Like i told Incognito, we can customize that image to fit any skin that you make for it. It IS just a request to keep that but if need be, you can remove. Its just a friendly gesture to leave the code where it is.

I know your not a fan of people leaving their signature on their work, for example removing forum copyrights.

Its basicly a favour leaving the copyrights there, but if you really feel like removing them, go ahead.
