I jsut re installed Renegade and then Renguard a couple of days ago and today when I played in the N00bstories server after about 20 mins of play Renegade jsut shut off and Rengaurd was flashing in the task bar and in the little message thing of what RenGuard is doing says "You have Joined n00bstories aow" or soemthing like that. I tried joining again but after a bout a minute it did that again, it's wierd. I've never had this happen before.
