GSA = game spy arcade @ http://www.gamespyarcade.com/download/
ASE = all seeing eye @ http://www.udpsoft.com/eye2/

renegade has 2 server listings one is WOL the other is GSA, server owners chose that server to
get listed on. And then you would use WOL or gsa to find the server you like. With ASE you can
see the servers from gsa not sure if it finds wol servers as well.
