The instructions you gave me Sir Phoenixx, don't work, since i can't find this "Weld" thing anywhere in renX. (exept for "target weld" and that has no effect).

And oblivion165, i already knew that... But i can't tell what vert is located where sinds it's all messy. I also can't detach the objects... Omg *goes crazy*

It's late for me... Ill look at it more carefully later... :bomb: :crazy:
