Subject: Is my system good for Renegade?
Posted by Dave Anderson on Mon, 21 Feb 2005 23:02:14 GMT

hmm. Truly renegade runs like a dream on my computer. But my neighbor does hive the same wireless internet that we do, ACTIONTEC so my "INTERNET" is the problem. Dell does not offer a graphics card upgrade for the dimension 300. But can i still plug in a new one anyway?

I am getting 454MB of ram like this.

1. Already have 256MB of ram
2. Am adding to sticks of 64MB ram to it.

256+64+64=384MB of ram sorry.
