Subject: Is my system good for Renegade?
Posted by icedog90 on Tue, 22 Feb 2005 03:20:43 GMT

IRON-FARTmrpirateIf we want to get painfully technical;
1000 MB = 1 GB
1024 MB = 1 GiB
Which is why "80 GB" hard drives end up being something like 74 gigs, in reality.
Yes, my 80GB only has 74GB usable...

Same here.
