My Mother Board fucking sucks too. It only supports AGP 4x and has two slots for ram.(1Gig max)
, I'm upgrading my mother board next with a new processor.

I'm thinking of getting a Geforce 6800 after that.

I just bought a Geforce FX 5500 with HL2. Runs smooth with my current processor. (30-50fps) It
was only 90.00USD.
