CommandoSRIRON FARTVitaminousIRON FARTMajiin Vegetablah blah blah

j_ball430Majiin Vegetalinux time?
If I can get my desktop to 1280x1024. :\

eh ?
linux does not allow a desktop that big?
why would you need it that big
Saves a LOT of room. I had my resolution at that for a long time. Anything bigger than that is too much though.

Not if you have a 21" CRT monitor, tho.
If you have a 2048x1536 resolution, text becomes a tiny bit hard to read.

I run at 1600x1200. It's 19' monitor, by the way.

I hate 1024x768, it's way too big. My graphics card supports up to 1920x1440.. lol. I run at 1152x864 though.
