Subject: New PHPBB exploit out...don't bother trying it here
Posted by Rapollo on Sun, 06 Mar 2005 14:20:10 GMT

I am crap at php but if I am not mistaken, like spreegem said:
doesnt == represent equal to and === represent identical to, so ("a" == 0) would return false
would it not? Like I said I am crap at php.

But back on topic, like j_ball:
vB owns all!
